## RACE

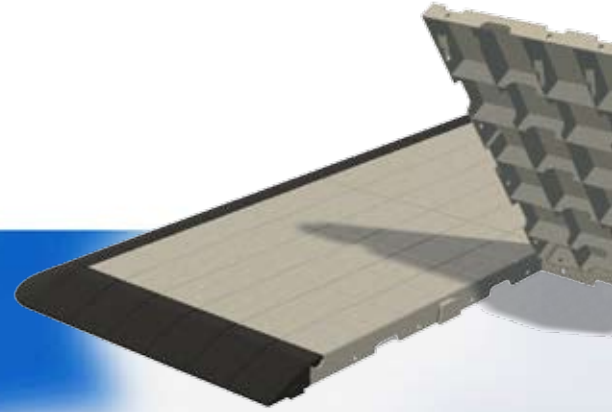

The ideal flooring  
for exhibitions and trade fairs

# IKA FLOOR

IKA FLOOR is a modular flooring system suitable for a variety of purposes, including exhibitions, trade fairs and much, much more. The system consists of 50x50 cm robust plastic floor tiles, which can be quickly and easily joined to form a very attractive floor with a hard-wearing, easy-to-clean surface. The tiles can be joined at will to form larger sections and the coupling system ensures a firm, even and exceptionally stable floor.

## Easy fitting

IKA FLOOR plastic flooring is exceptionally easy to lay. The tiles are simply clicked together and chamfered edging is then added if required. Fast, easy and efficient, even for a single person.

## Attractive appearance

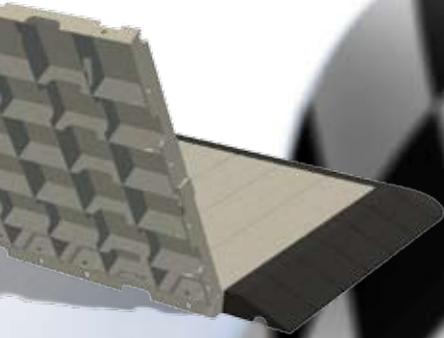

No matter the use, IKA FLOOR provides attractive flooring. Thanks to its elegant surface, the flooring is ideal for exhibitions, trade fairs, motor sports and other outdoor events.

IKA FLOOR is available with solid or stylishly perforated surface.

IKAFLOOR is also available with chamfered edges.

## Applications

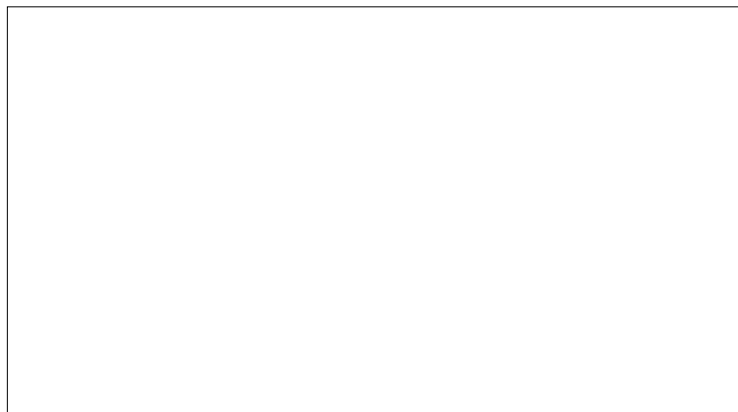

- Trade fair stands
- Garages and workshops
- Motor sports events
- Exhibition platforms in shops and superstores, car showrooms, etc.
